

Quartz Crystal Resonator (32.768KHz)

TC26SM2

General Description

The TC26SM2 IS A low frequency through-hole technology Watch Quartz Crystal Unit, which incorporate a tuning fork Quartz Crystal Resonator. It operates under vacuum in a hermetically sealed tubular metal can package

Features

High stability and low aging guaranteed by hermetic sealing. Available for extended operating temperature range. Small size, low profile, lightweight. 100% Pb-free, RoHS-compliant. Very price competitive product

Main Applications

Mobile phone, Notebook

Electrical characteristics

Item	Symbol	Values
Part number		TC26SM2
Nominal frequency	F	32.768 KHz
Frequency tolerance (@ +25°C)	$\Delta f/F$	$\pm 15 / \mathbf{20}$ ppm
Frequency stability	$\Delta f/F$	-0.04 ppm/°C ²
Operating temp. range	T _o	-40°C / +85°C
Storage temp. range	T _s	-55°C / +125°C
Load capacitance	C _l	8.0 / 10 / 12.5
Equivalent serie resistance	ESR	50 KΩ MAX
Shunt capacitance	C ₀	1.45pF [typical]
Motional capacitance	C ₁	0.0034pF [typical]
Drive level	P	0.5μW max
Turnover temperature	T _t	+25°C ±5°C
Quality factor	Q	50000 min.
Aging	$\Delta f/F$	±3ppm max @ +25°C

1 : Frequency (MHz)

□□□.□□□□□□□□

max 10 digits including comma

2 : Load capacitance

P8 = 8pF
 P10 = 10pF
 P12.5 = 12.5pF

3 : Tolerance

C= $\leq \pm 20$ ppm
 D= $\leq \pm 15$ ppm

4 : Op. Temp. range

N=-40/+85

5 : Packing

TR = Tape & Reel (3K pcs)

6 : Customized code

Note : factory use
